

## Existing Tool Checklist

If you have an existing tool in place please would you answer the following questions?

1. Tool history, State of repair?	
2. Tool size – please state the physical dimensions?	
3. Number of cavities in the tool? Are they all functional?	
4. Sprue or hot runner system?	
5. Total shot weight?	
6. Current production rate of existing tool? What is the current cycle time?	
7. Material type? Colour and additive requirements?	
8. Secondary operations requirements?	
9. Annual volume required?	
10. Average run size and frequency?	
11. Target component price?	
12. Quality control requirements?	
13. Packaging requirements?	
14. Would you like PNP to maintain your tooling?	

**If possible, please arrange to send us a sample of the moulding.**
